# Research is only as trustworthy as the record behind it.

A clinical trial can run for a decade and be inspected years after it ends. The essential documents and study data behind it have to survive that long — unchanged, attributable, and ready for a regulator to open at any moment. In practice this is hard: data ends up spread across different places and systems, making it increasingly difficult to keep an overview and stay compliant.

VerityOne makes it simple. It is a secure, central place to store essential study documents and data — running as SaaS on one of the most reliable and rigorously secured cloud platforms in the world. The instant a document or dataset is filed, it is sealed: written once, fixed with a cryptographic checksum, and logged in an audit trail that only ever grows. Every action is recorded automatically, so it is always clear who did what — and your organisation stays in control of its data while meeting every requirement, effortlessly.

## BUILT TO THE STANDARDS INSPECTORS EXPECT

GCP

ALCOA+

**Sealed on arrival**

**Cryptographic proof**

**Full audit trail**

**15–30 yr retention**

## FOUNDATION

# Built on secure, compliant cloud infrastructure.

VerityOne runs on Amazon Web Services (AWS) Sovereign Cloud in EU — a platform offering near-unlimited storage and the most recent technology from one of the most secure clouds available, with compliance solutions available out of the box at the highest security standards in the market. On this foundation, VerityOne's storage layer is purpose-built for the retention and integrity requirements of the eTMF.

### eTMF

Secure storage, structuring and archiving of essential study documents, with a retention period of 15–30 years, conforming to the eTMF and applicable regulation.

### Research Drive

Storage and sharing of supporting research data, using the same secure storage location as VerityOne's eTMF — automatically, within each study.

---

## WHAT THE APPLICATION HANDLES

- ✓ Store, update, read and delete study documentation
- ✓ Full audit trail across the platform
- ✓ Complies with applicable laws and regulation on every action
- ✓ Role-based access control (RBAC) throughout

PLATFORM FEATURES

# Everything a study team needs.

**Study management**

Create studies from WMO templates; manage access.

**Study explorer**

Upload, download and version documents.

**Research Drive**

Free workspace for supporting research data.

**Archive**

Query and review closed, archived studies.

**Audit trail**

Who did what, and when — for every action.

**User management**

Users, roles and studies at a glance.

ROLES & PERMISSIONS, PER STUDY

| ROLE                   | DOWNLOAD | UPLOAD | DELETE | MANAGE | ARCHIVE |
|------------------------|----------|--------|--------|--------|---------|
| Principal Investigator | ✓        | ✓      | ✓      | ✓      | ✓       |
| PI Delegate            | ✓        | ✓      | ✓      | ✓      | ✓       |
| Researcher             | ✓        | ✓      | —      | —      | —       |
| Viewer                 | ✓        | —      | —      | —      | —       |

Let's protect your evidence.
